Investors are cautioned that the following important factors, among others, may affect these forward-looking statements: Delek Logistics' substantial dependence on Delek US, thereby subjecting Delek Logistics to Delek US' business risks; risks and costs relating to the age and operational hazards of our assets including, without limitation, costs, penalties, regulatory or legal actions and other effects related to releases, spills and other hazards inherent in transporting and storing crude oil and intermediate and finished petroleum products; the impact of adverse market conditions affecting the utilization of Delek Logistics' assets and business performance, including margins generated by its wholesale fuel business; uncertainty relating to the impact of the COVID-19 outbreak on the demand for crude oil, refined products and transportation and storage services; uncertainties regarding future decisions by OPEC regarding production and pricing disputes between OPEC members and Russia; an inability of Delek US to grow as expected as it relates to our potential future growth opportunities, including dropdowns and other potential benefits; risks related to Delek US' exposure to Permian Basin crude oil, such as supply, pricing, production and transportation capacity; gains and losses from derivative instruments; the results of our investments in joint ventures; the ability of the Wink to Webster joint venture to construct the long-haul pipeline; the ability of the Red River joint venture to expand the Red River pipeline; the ability to grow the Big Spring Gathering System; general economic and business conditions affecting the geographic areas in which we operate; adverse changes in laws including with respect to tax and regulatory matters; and other risks contained in Delek US' and Delek Logistics' filings with the United States Securities and Exchange Commission.

## Non-GAAP Disclosures:

Delek US and Delek Logistics believe that the presentation of distributable cash flow ("DCF"), earnings before interest, taxes, depreciation and amortization ("EBITDA") and adjusted EBITDA provide useful information to investors in assessing their financial condition, results of operations and cash flow their business is generating. DCF, EBITDA and adjusted EBITDA should not be considered as alternatives to net income, operating income, cash from operations or any other measure of financial performance or liquidity presented in accordance with U.S. GAAP. DCF, EBITDA and adjusted EBITDA have important limitations as analytical tools because they exclude some, but not all, items that affect net cash provided by operating activities and net income. Additionally, because DCF, EBITDA and adjusted EBITDA may be defined differently by other companies in its industry, Delek US' and Delek Logistics' definitions may not be comparable to similarly titled measures of other companies, thereby diminishing their utility. Please see reconciliations of DCF, EBITDA and adjusted EBITDA to their most directly comparable financial measures calculated and presented in accordance with U.S. GAAP in the appendix.

1) Information for illustrative purposes only to show potential based on estimated dropdown assets listed. Actual amounts will vary based on market conditions, which assets are dropped, timing of dropdowns, actual performance of the assets and Delek Logistics in the future. Expected amounts adjusted for what is captured in the LTM period.  
 2) Please see pages 29 for a reconciliation of forecasted EBITDA or adjusted EBITDA to forecasted net income for the Krotz Springs midstream assets.  
 3) Please see page 24 for reconciliation of Delek Logistics net income to EBITDA.  
 4) We are unable to provide a reconciliation of this forward-looking estimate of adjusted EBITDA because certain information needed to make a reasonable forward-looking estimate of net income is difficult to estimate and dependent on future events, which are uncertain or outside of our control, including with respect to unknown construction timing, unanticipated construction costs and other potential variables. Accordingly, a reconciliation to net income as the most comparable GAAP measure is not available without unreasonable effort. These amounts that would require unreasonable effort to quantify could be significant, such that the amount of projected GAAP net income could vary substantially from the amount of adjusted EBITDA projected.
